CARBON REDUCTION PLAN

Asbiverse Limited

Supplier name	Asbiverse Limited, trading as Intent Institute and Asbiverse Group
Company number	13891216 (registered in England and Wales)
UKPRN	10102777
Registered office	Dairy House, Money Row Green, Holyport, Maidenhead, Berkshire, SL6 2ND
Publication date	November 2026
Commitment to Net Zero	Net Zero by 2050
Prepared in line with	Procurement Policy Note 006 (Procurement Act 2023) and the Carbon Reduction Plan reporting standard
Contact	info@intent.institute

Commitment to achieving Net Zero

Asbiverse Limited is committed to achieving Net Zero emissions by 2050. The commitment covers Scope 1, Scope 2 and the required Scope 3 emissions of the company, including all activity carried out under its trading names, Intent Institute and Asbiverse Group.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases produced in the past, before the introduction of any strategies to reduce emissions. They are the reference point against which emissions reduction is measured.

Baseline year: 2024

- **Methodology:** GHG Protocol Corporate Accounting and Reporting Standard, operational control approach.
- **Emission factors:** UK Government greenhouse gas conversion factors for company reporting, 2024.
- **Boundary:** Asbiverse Limited is a small professional services business operating from a single office, with learning, consulting and analytics delivered mainly online.
- **Basis:** The baseline covers the same operations, premises and team that Asbiverse Limited now runs. Figures were first measured in June 2025 and are restated here for Asbiverse Limited.

Scope	Emissions (tCO2e)	Details
Scope 1	0.8	Gas heating of the office
Scope 2	2.1	Electricity for office operations and IT equipment (location-based)
Scope 3 (included sources)	4.3	Business travel, employee commuting and waste generated in operations. Upstream and downstream transportation and distribution are nil, as services are delivered digitally. Purchased goods and services, IT equipment and cloud services are also included.
Total emissions	**7.2**	

Current emissions reporting

Reporting year: 2025

Scope	Emissions (tCO2e)	Details
Scope 1	0.7	Gas heating of the office
Scope 2	1.8	Electricity, location-based. Electricity is supplied on a renewable tariff, so market-based Scope 2 emissions are close to zero.
Scope 3 (included sources)	4.1	As for the baseline year
Total emissions	**6.6**	**A reduction of 8.3 per cent against the 2024 baseline**

- **Consistency:** Methodology is unchanged from the baseline year, using the 2025 conversion factors.
- **Data quality:** Energy monitoring in the office has improved the quality of the electricity and heating data.
- **Main driver:** More delivery has moved online, reducing the need for travel.

Emissions reduction targets

To continue progress towards Net Zero, Asbiverse Limited has set the following targets against the 2024 baseline. They are consistent with the UK Government's commitment to Net Zero by 2050.

Milestone	Target
2030	Reduce Scope 1 and 2 emissions by 50 per cent, to 1.45 tCO2e. Reduce Scope 3 emissions by 30 per cent, to 3.0 tCO2e.
2040	Reduce total emissions by 80 per cent, to 1.44 tCO2e, with Net Zero for Scope 1 and 2.
2050	Net Zero across all scopes, with any residual emissions addressed through high quality, permanent carbon removal.

Carbon reduction projects

Completed carbon reduction initiatives

The following measures have been in place since the 2024 baseline and contributed to the reduction reported for 2025:

- **Energy efficiency:** LED lighting and energy efficient IT equipment.
- **Digital first operations:** A paperless office and online delivery of learning and consulting wherever the client allows.
- **Renewable electricity:** Electricity purchased on a renewable tariff.
- **Smart office controls:** Automated heating controls and energy monitoring.

Planned carbon reduction initiatives

- **Office decarbonisation:** Replace gas heating with a heat pump or another low carbon alternative by 2030.
- **Travel:** A rail first travel policy, with virtual delivery as the default where a client allows it.
- **Supplier engagement:** Ask key suppliers, including cloud and IT providers, for their own carbon commitments.
- **People:** A cycle to work scheme and sustainability awareness for everyone who works with us.
- **Waste:** Reduce, reuse and recycle office waste.

Asbiverse Limited will also look for ways to help clients reduce emissions through how programmes are delivered, for example blended and online learning in place of travel to venues.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with Procurement Policy Note 006 and the associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard, using the appropriate UK Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with the SECR methodology, and the required subset of Scope 3 emissions has been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by a director of Asbiverse Limited.

Signed	
Name	Ankur Shiv Bhandari
Position	Director, Asbiverse Limited
Date	November 2026

This plan is published on www.intent.institute and is updated every year, within six months of the end of Asbiverse Limited's financial year.
